Model LGF Portable Moisture Meter for Gypsum/Plaster Wallboard

- ▶ Moisture tests can be performed on moving board
- ▶ Easy Portability for checking board moisture distribution
- ▶ Direct reading moisture scale plus "Dry", "OK" and "Wet" color scales
- ▶ Allows moisture comparisons between kiln decks
- ▶ Test 1/4" to 3/4" thick board
- ▶ Patented RF Power-Loss Absorption Principal
- ▶ Powered by a rechargeable battery
- ▶ Complete with Carrying Case and Charging Cord

The Model LGF Portable Moisture Meter obtains instantaneous, non-destructive moisture analysis on gypsum wallboard. The Model LGF compliments the original Model LG which has been the leader in the measurement of moisture content in gypsum wallboard for over 35 years.

The Model LGF is designed exclusively for gypsum wallboard. A flat plate sensor allows intimate contact with the wallboard and can be slid across the surface without the danger of static damage. No surface scratching, marring or puncturing occurs since the Model LGF measures moisture by generating a non-destructive Radio Frequency Field which penetrates deep into the wallboard.
